Pixel Portrait

Color in the squares to create a masterpiece of your own image (a self portrait), someone special to you, a figure or character you've read about, or even someone you imagine! Use the dotted lines to help color a head, eyes, nose, mouth, neck, and shoulders. Add other features (hair), accessories, and background. (If you prefer, try the blank grid on the back.) Optional:

Use construction paper or poster board to make a frame and hang your portrait.

Try a pet portrait! (Use reverse side.)
